

Summit County – Akron 800Mhz Regional Radio System In-School Emergency Communications System

Intent

The SCA8RRS In-School Emergency Communications System is a public safety radio which allows communications to your local 911 Call Center when use of a landline or mobile phone is not an option. Your local 911 Call Center manager will contact you to review the policy for use of this radio.

Operation

With the exception of the controls indentified in Figure 1, all other controls have been disabled. The radio will be powered on continuously and can only be disabled by disconnecting the power cord from the wall outlet. Unless connected to an uninterrupted power supply (UPS), the radio will not function if there is a power outage.

Controls

- 1. Volume Up: Press and hold to raise volume.
- 2. Volume Down: Press and hold to lower volume.
- **3. Emergency Button:** Momentarily press to alert your 911 Call Center. The radio will display "EMERGENCY" and automatically transmit for 10 seconds allowing the user to speak hands-free. After 10 seconds the radio returns to READY mode to allow reception of messages from the 911 Call Center. The user can transmit additional messages to the 911 Call Center by holding down either PTT key on the desk microphone (Figure 2) then releasing to listen for a response. When the event ends, press and hold the Emergency Button for one second to clear the alert.
- **4. Ready/Test:** Press and hold to change from Ready mode to Test mode when instructed to by the 911 Call Center. When test is complete, press and hold to return to Ready mode.

Radio Operational Modes

Ready Mode
Normal Operating Condition

Emergency Button Activated You Can Speak Hands-Free for 10

Seconds

Alert Received

Displays The Name of Another School
That Activated Their Emergency Button

Test Mode

Select Test Mode Only When Instructed To By Your 911 Call Center

Out of Range Contact Tech Support
