Summit County Building Standards launching new permit and inspection portal

SUMMIT COUNTY, OHIO—Beginning Monday, September 28, Summit County Division of Building Standards will utilize a new permit and inspection portal, GovWell. This new platform supports the County's ongoing efforts to make services more efficient, transparent, and responsive for residents, businesses and contractors.

The new system provides a single place to apply for building permits, submit plans, schedule inspections, and track application status online. By bringing these steps together in one platform, the County aims to further reduce delays, improve visibility into the review process, and make it easier for applicants to understand next steps.

Building Standards' current service portal, CityWorks, will continue to be accessible for **existing permit and inspection requests only**. No new requests will be accepted in CityWorks after Friday, September 25.

Additional details and a link to the Govwell platform will be available at <https://co.summitoh.net/BuildingStandards>.
